

Hello

How are you?

I am looking for freelancers who have full verified Upwork account.

Let me introduce myself. I am the manager of new opened developing team. I have many Asian developer guys who do mobile and game programming. They all want to have the Upwork account to get money by demonstrating their skills. But as you know, most of clients like Europe or USA account, so we failed to get the job several times. As i am the team manager of developing guys, i have to charge them. I decided that i have to use Europe or USA account at the moment. Of course, i will pay for that on PayPal. I will pay \$100 ~ 200 for per account. We can discuss price in more detail.

If you are interested, please contact me.
